Welcome to Koa Academy Kenya

Welcome to Koa Academy Kenya. We're a highly rated online school offering the internationally recognised ISC curriculum for Grades 4–12, with the highest teacher-to-student ratio.

The wood of a Koa tree is both flexible and strong. That's how we've built our online school. We give families true flexibility and learning is individualised, while at the same time being robust and structured. Our Pods are highly engaging, which lets us focus on a robust academic education as well as socio-emotional development. Learners work at their own pace with constant connection to peers and a team of qualified and experienced teachers.

Our Pods

Each learner is placed into a Pod of 8. That's right - 8. We've always wanted smaller classes, and now we have them! Our virtual classes are highly engaging and accountable, where everyone has an opportunity to be seen and heard. Each Pod has a dedicated Pod Teacher who meets with them regularly throughout the week, providing focused support.

Our Pillars

Koa is custom-built on best practices in education to maximise the benefits of online learning for each individual. Koa's unique approach was specifically created to be:

Engaging

We believe that learning happens best in real community. People are connected in meaningful ways to others and their work. At Koa, no one is just a number.

Accountable

With great power comes great responsibility. We know that accountability is key, so we have tools and rhythms which hold everyone accountable - no more guessing!

Real-World Relevant

The world is changing faster than ever! So rather than simply presenting 'traditional school on a screen', we have re-designed the online learning experience to reflect real life and develop individuals who are strong and adaptable, ready for the future world of work.

Our Values

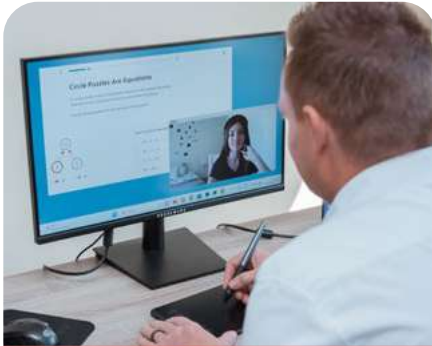

Want to know what it takes to succeed at Koa? These three values guide our actions as a school and are true for all of our learners and teachers.

We Show Up
We arrive on time, prepared, with our cameras on.

We Communicate
We communicate early and often with friendliness and respect.

We Track
We take personal responsibility for our academic progress, checking our Dashboard daily.

The International Secondary Certificate (ISC) Accreditation

Accreditation

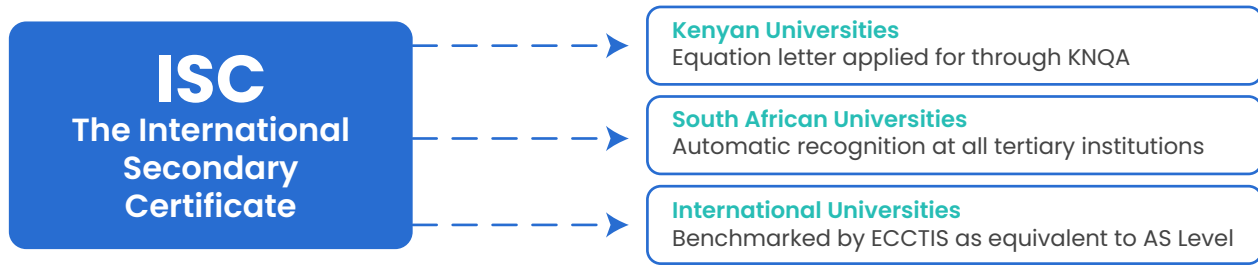

Koa Academy is registered with the Independent Examinations Board (IEB) and follow their internationally recognised International Secondary Certificate (ISC) curriculum.

Why the ISC?

We have chosen to offer the ISC curriculum as opposed to alternative options for several reasons, including:

- ✓ The ISC curriculum is purpose-built - an African curriculum that unlocks international opportunities.
- ✓ A higher rate of university progression than other curricula, thanks to higher order thinking.
- ✓ A focus on application over memorisation of content.
- ✓ Critical thinking skills are prioritised.
- ✓ Greater flexibility in delivery of the curriculum and assessments.

The ISC Path to University

Get in touch if you'd like to explore university pathways with us in more detail - we're here to help.

Koa Academy has truly been an answer to prayer for our family. As we searched for a trusted school system and curriculum to stay connected to from abroad, Koa offered exactly what we needed. Our child has truly blossomed, thriving academically, growing in leadership, and even flourishing socially. Koa gets it right.

We're so thankful for the innovation, care, and structure the school provides. Communication is excellent, I'm able to reach out to the headmaster or teachers and always receive a timely, thoughtful response. Thank you, Koa.

~ Olsen family, Nairobi.

Reports

We publish official school reports every term, four times a year. However, you won't need to wait for months until you know how your child is progressing. See the section on their Dashboard to get an idea of how we track and report their progress across all subjects in real-time.

Academics in Grades 4 – 9

Content delivery

Can you imagine if your child's school designed a learning path with them in mind? We can, and we have! Gone are the days of the teacher being the focal point, lecturing content to large groups of learners at once. Our learners complete their work independently through online courses and platforms which were designed specifically for the online space. This lets them work at their own pace, while our teachers support each learner where they need it. Each course or platform that we use at Koa has the following elements:

Bite Sized

Topics are covered in smaller chunks, which is far more effective than simply handing over a whole lot of information at once, like a textbook.

Real-Time Feedback

Teachers, learners, and even parents are able to see progress in real-time, thanks to smart data being constantly fed back to us.

Mastery Based

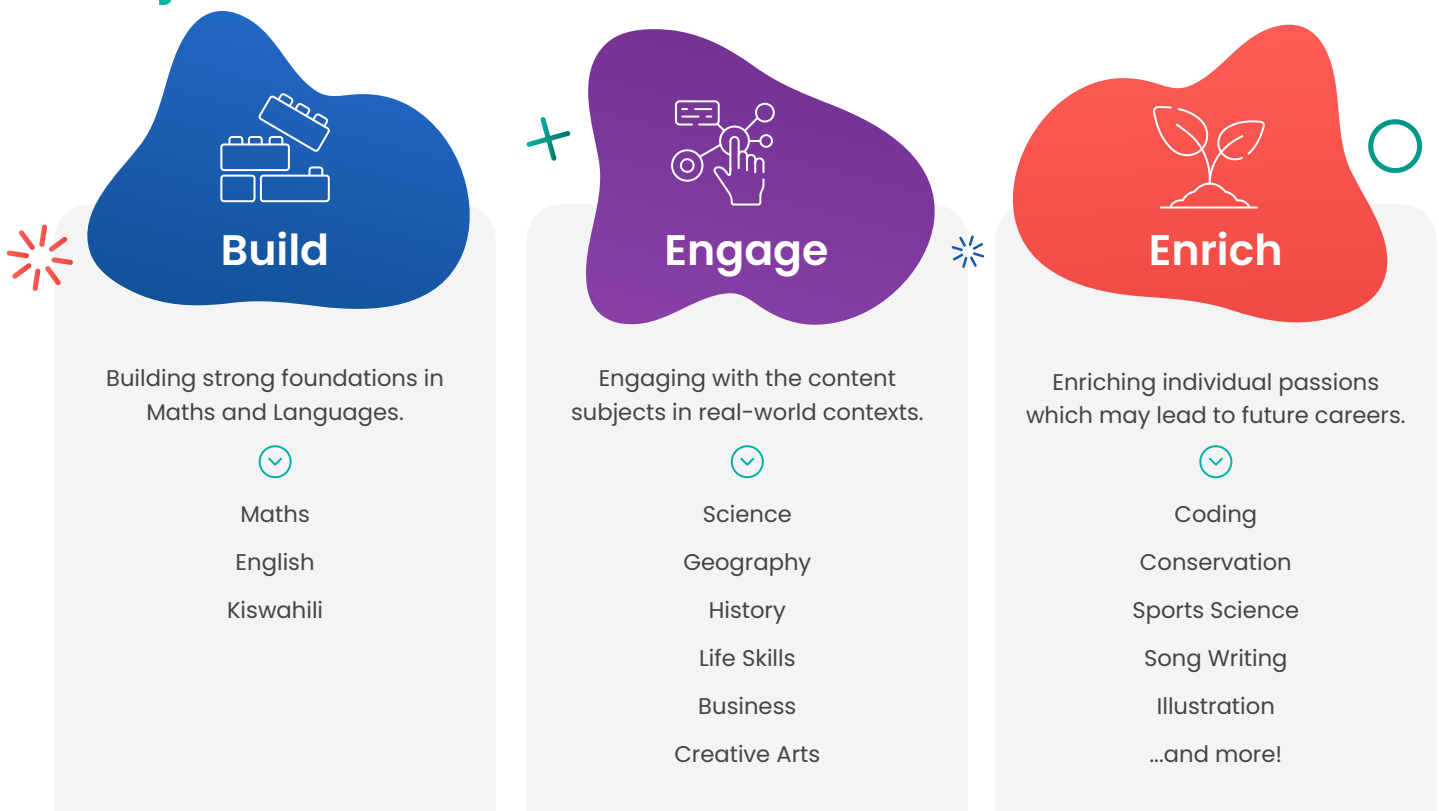

Automatic checkpoints mean that a learner will progress as they show mastery over each concept.

Ongoing Assessment

Most assessments are built straight into the courses, while others are completed in groups. This builds confidence and encourages learning.

Subjects

Contact Time

We have built in a generous amount of contact time with our teachers. This happens in daily rhythms and in small groups for maximum focus on each learner. We believe that consistent academic support is not just for a handful of learners when they are struggling, but for everyone.

Pod Connect

Pods of 8, soft skills and relationship building.
Earlier in the morning several times each week.

Teacher Time

One-on-one help with a particular problem.
Bookable on-demand by either teacher or learner.

Check-in

Groups of 4-8, focus on academic progress. Later in the morning several times each week.

Workshops

Groups of 4-8 with a subject teacher for learners who need specific support in a subject.

Masterclasses

Grade-wide, a more traditional lecture style lesson with a teacher 1-3 times each week.

Typical timetable

Every child is unique, so we believe that their timetable should be too. At Koa, each learner has a timetable that is designed to suit their individual strengths and needs. This is possible thanks to the fact that they are working on their academic platforms at their own pace. One learner can be doing Maths, while someone else in their Pod is working on a History project. Depending on their age, academic speed, and your family preferences, most timetables will fill around 4-6 hours of the day.

Example of a daily timetable

09:00	Connect
09:30	Maths
10:15	Brain Break
10:30	English
11:15	Kiswahili
11:45	Brain Break
12:00	Check-in
12:30	Engage
13:15	Masterclass: History
14:00	Lunch
15:00	Enrich

■ Live Sessions

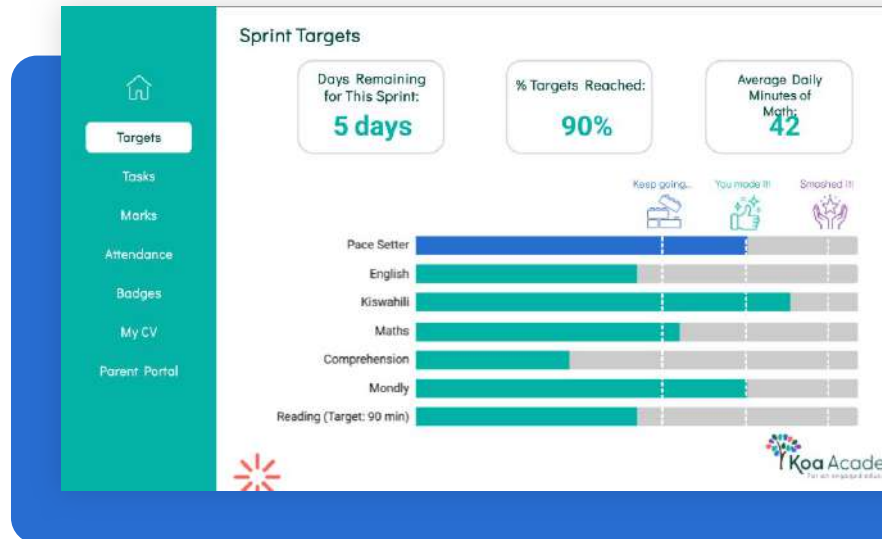

Target Sprints

Since each learner is working at their own pace, an important question is: how do we know that they are working at the required pace? This is where our Target Sprints come in.

Every two weeks, our learners meet with their Pod Teacher to set Targets in key subject areas for the next 2 week Sprint. Their progress is tracked and reported on their Dashboard every day.

Our Target Sprints are an excellent way to empower learners, giving them a deeper sense of ownership when it comes to their work, while making sure that they are progressing at a healthy pace.

Expos

Each term we have one large task called The Expo, culminating in a presentation to external guest judges on Demo Day. Our Expo's cover the work from several content subjects integrated to better resemble a real-life work project. Here are just a few examples:

Business Expo

Launch an actual business idea of your own, then pitch your business to real life angel investors.

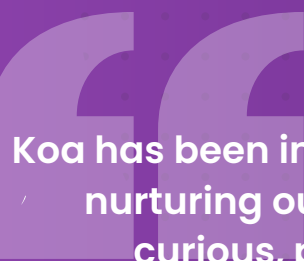

Art Expo

Design a board game based on an imaginary world, complete with backstory, characters and cosplay.

Science Expo

Use the Design Process to create and test a solution to one of the United Nations' Sustainable Development Goals.

Koa has been instrumental in nurturing our 3 sons to be curious, proactive, and independent learners. We highly recommend Koa!

~ Mecha Family, Nairobi

Academics in Grades 10 – 12

Content delivery

As a learner matures, so should the way they work. Our Grade 10-12 program is designed specifically with this age group in mind. Each term, our learners receive an online course from each of their Subject Teachers. This Coursework has all the content which needs to be covered in that term and learners are able to work through it independently at their own pace. Coursework at Koa is designed for the online space, and delivers content with the following key principles in mind:

Bite Sized

topics for a controlled workload.

Ongoing Assessment

to build confidence.

Real-Time Feedback

to inform learning gaps

Mixed Media

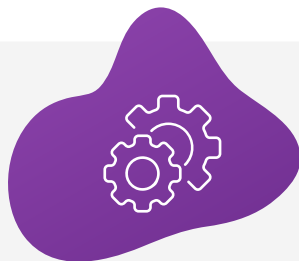

for maximum engagement.

Mastery Based

checkpoints to ensure understanding.

Subjects

Compulsory Subjects

Mathematics or Quantitative Reasoning
English: Home Language
Active Citizenry

Elective Subjects (Choose 4)

Biology
Physical Sciences
Geography
History
Business Studies
Tourism
Computer Studies

If there is a specific subject which you want your child to take that we do not offer, you can reach out to us to find out about taking an elective subject with a third-party service provider.

Contact Time

Even in the senior Grades, we believe that learning happens best when everyone has a good amount of consistent support. So each learner has at least 15 live lessons every week with their Subject Teachers. This happens in the form of:

Masterclasses

Grade-wide, more traditional lecture style, with a subject teacher. Once a week for each subject.

Workshops

Pods of 8, interactive tutorial style lessons with a subject teacher. At least once a week per subject.

Pods of 8

Pods of 8, soft skills and relationship building. At the start of the day at least twice a week.

Typical timetable

Every learner is able to design their own unique daily timetable around their live lessons to suit them best. This flexibility gives each learner a sense of empowerment and can be used to lean into their strengths. Most Grade 10–12 learners are engaged with schoolwork for 6–7 hours per day.

Example of a daily timetable

09:15	Pod Connect
10:00	Coursework: English
10:45	Masterclass: Biology
11:30	Brain Break
11:45	Workshop: Maths
12:30	Workshop: Geography
13:15	Lunch Break
14:00	Coursework: History
15:00	Coursework: Business
16:00	Organise and Wrap Up

 Live Sessions

Assessments

We prepare our Grade 10–12 students for their final exams through our assessment programme. Tests take place weekly, while exams are written twice a year. Independent coursework includes both informal activities, which support learning, and formal tasks, which contribute to overall marks. To ensure the validity of our assessments, we leverage up-to-date online test proctoring platforms, as well as plagiarism and AI detectors. Only the final Grade 12 exams are written in person at a centre in Kenya arranged by Koa.

Dashboards

We want to make sure that parents know exactly how their child is doing. We want teachers to know just where each learner needs assistance. And we want to empower learners to take age appropriate responsibility for their learning.

This is where our Dashboards come in. Every learner has their own Dashboard, visible to them, their teachers and parents. These give a live daily snapshot of work progress, attendance, goals, subject marks, task submission, badges, and more!

Teachers monitor these Dashboards every single day, and we encourage learners and parents to do the same.

Click here to watch our dashboard video.

Head of Arts and Culture: Majozi

We are thrilled to have Majozi as our Head of Arts and Culture. Majozi is an award-winning South African musician and is passionate about creating a space in education for cultural and artistic passions to flourish.

Extracurricular Activities

One of the great benefits of an unbundled education is that families have the time, flexibility and freed up resources to pursue particular interests outside of the school. As a matter of fact, Koa has several learners who attend the school specifically for this reason, allowing them to focus on their interests, get professional training, and develop a broader friendship base for healthy socialisation.

In-Person Socials

A big part of being an engaging school is having a community of people who we can interact with meaningfully. During the day, our learners get to connect with each other in a healthy, intentional online space. But we also want to create the opportunity for in-person socialisation. So every term we conduct in-person events in cities around the country. These events go a long way to helping our families form connections which may develop into meaningful friendships.

Typically, there are two types of events:

Socials

This is when we simply get together for some fun! We'll let you know what we're up to, and you can come along with the whole family.

Educational Outings

These events are similar to our socials, but have an educational twist. We're on a mission to have a good time, connect, and learn all at once.

IT & Stationery Requirements

The Tech

A good computer and Internet connection are critical for successful online learning. Please note that a tablet, iPad or smartphone alone is not suitable as the primary device for learning at Koa. Here are our minimum requirements:

Computer or Laptop

- 4+ GB RAM and reliable processor
- 11.6+ inch screen (14+ inch recommended)
- Grades 10-12 require a mobile phone when submitting tests

Hardware

- Webcam
- Microphone

Internet

- Speed of at least 10/10 mbps per person connected at home
- 100+GB of data per month (uncapped recommended)
- Recommended browser: www.google.com/chrome

Back-up Power

- Grade 10-12 learners are required to have a backup power solution to keep their computer and WiFi working for at least 2 hours in case of power outages

Did you know?

At Koa, we have intentionally designed our programme to work entirely without a mobile phone right up to Grade 9? Without a phone, your child is much more likely to be distraction free! **Only Grades 10-12 require a mobile phone for tests.**

Stationery

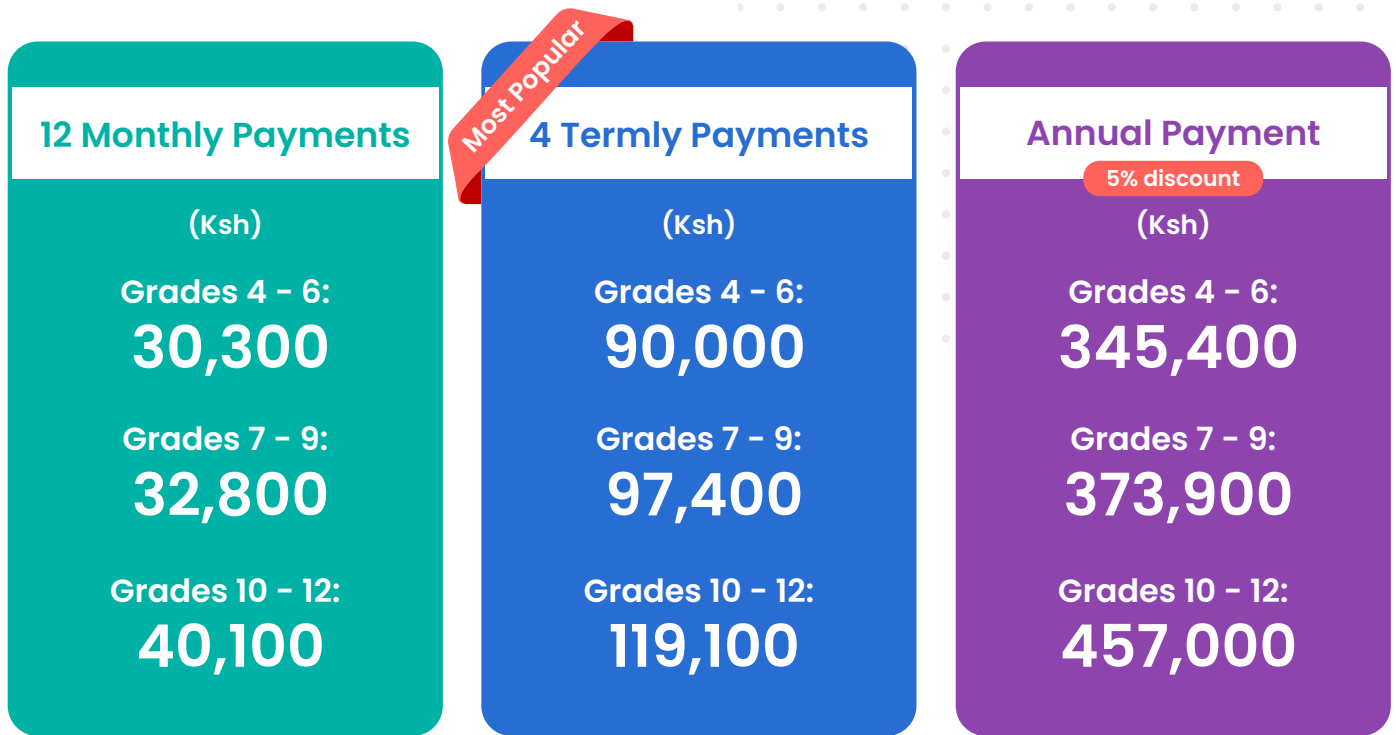

We are big fans of everything digital. But we are also big fans of physical learning, so our school work also involves stationery. On application, we will share a basic list of stationery for you to prepare.

2026 Fees

We think families should have flexibility when it comes to education, so we work on a simple monthly subscription-style fee.

- no surprises
- no deposit
- no long tie-in periods (1 month's notice)

Following a once-off enrolment fee of Ksh6,500, we have three payment options available.

Included

- ✓ All teacher contact time
- ✓ Textbooks online
- ✓ Learning material, courses and platforms
- ✓ Google Workspace account
- ✓ Online Drive storage
- ✓ Koa Academy email account
- ✓ Academic support
- ✓ Target setting and tracking
- ✓ Quarterly Demo Days
- ✓ Regular online social events
- ✓ Benchmarking assessments
- ✓ Learning path management
- ✓ Ongoing progress reports
- ✓ Annual Grade progression

Excluded

- ✗ Computer and Internet
- ✗ Stationery
- ✗ In-person socials and events
- ✗ Final Grade 12 ISC exam fees

Important to Note

- Annual fees must be paid by 5 January 2026 to qualify for the discount.
- Required payment method is EFT.
- Learners joining in January will be billed for the entire month.
- Learners joining from February onwards will be billed pro-rata.
- Joining Koa in Grades 8 - 12 after term 2 will draw a textbook charge.
- Learners in Grades 10 - 12 who choose to take additional subjects beyond the 7 required by the ISC will be charged an extra fee of Ksh6,500 per subject per month.
- Changing subjects in Grades 10-12 will draw a Ksh5,300 charge per subject.

Applications

We do orientation twice every month, enrolling learners throughout the year until mid-October. At Koa we're on a mission to bring joy back into learning, create a space for out-of-the-box thinkers, reward real growth, and be rooted in meaningful engagement. Children are powerful. Our job is to help them realise that. If you agree, we'd love for you to join us! The application process happens in five simple steps:

 **01**

School admissions contract

Read our Ts&Cs.

Eligibility check

Confirm that Koa is a good fit for you.

02

03

Application form

Fill out your child's details.

Application fee

We'll send an invoice for your first fees.

04

05

Orientation

We'll get you set up for your first day at Koa.

Ready to get started?

Visit our website (www.koaacademy.com) and click 'apply now'.

What I love about Koa Academy is precisely that they have NOT done a direct bricks and mortar to online translation. This is NOT school as you've always known it, just online.

As an ex-schoolteacher myself I can see they have genuinely re-thought every aspect of education (not just school) and tried to find the most effective ways to truly educate children as a whole person, with the knowledge and the skills they will need for the future.

~ The Jahnig Family, South Africa
